

"EDUCATING ENERGY CONSUMERS TOWARD ECONOMICAL ENERGY OPTIONS"

PRESS RELEASE

2011 ENERGY NEW YORK AWARDS ("ENYA") PRESENTED

New York, NY, July 8, 2011. **FOR IMMEDIATE RELEASE**

On Monday evening, June 27, 2011, the 2011 Energy New York Awards ("ENYA") were presented under a setting sun at the Tribeca Rooftop high above the southwest corner of Hudson Avenue and Canal Street.

This year, five extraordinary organizations have been nominated:

- **399 Park Avenue** (Boston Properties). The team at Boston Properties at 399 Park Avenue has reduced site energy use by an impressive 16.5% (from 118 to 98.5 kbtu/sf) since December 2008. Because the building is so large (1.697 M SF) the net Greenhouse Gas reduction totals 2652 MTCO₂e for the same period. This is the equivalent to removing 506 passenger vehicles from the road or not consuming 6165 barrels of oil. Their Energy Star Portfolio Manager rating increased 9.7% during this time.
- **230 Park Avenue** (Monday Properties). The transformation of 230 Park Avenue from an historic icon of the New York skyline to a 21st Century technology leader is an example for all to follow. The building team's drive and diligence in seeking out and maximizing energy conservation opportunities clearly demonstrate how creative thinking and strong leadership can produce extraordinary results, including the building's record-setting Energy Star and LEED accomplishments.
- **St. Albert Hall** (St. John's University). A leader in the PLANYC "University Challenge," St. John's University (STJ) is deep into a three-year plan built on an investment grade energy audit and valued at \$22m in energy projects. This Plan will reduce Greenhouse Gas emissions by 30% by 2014. The largest conservation project within that grant is the upgrade of 77 chemical fume hoods. The conversion project is estimated to save 800,000 kWh and 46,000 Therms annually.
- **General Services Administration** (United States of America). Region 2 of the General Services Administration (GSA) has purchased over 782 million kWh of renewable power since FY01, well before the Energy Policy Act of 2005 and Executive Order 13423 requirements promoted green purchasing. Continuing its leadership role, GSA ran a competitive procurement on November 4, 2009 through which it began receiving renewable power supply on May 1, 2010. Under the terms of these contracts, GSA will purchase a total of 217 million kWh of electricity for federal facilities. An astounding 95 percent, or 206 million kWhs, will come from

OFFICERS

Columbia University
Frank Martino, Co-President
Levin Energy Advisors, LLC
Daniel Levin, Co-President
Cassidy Turley, Inc.
Jack A Terranova, P.E., R.P.A., Vice President
Corporation of Trinity Church
Alec Salticov, BEP, CEM, CEA, LEED AP, Vice President
Jones Lang LaSalle
Tony Cartagine, Vice President
Jones Lang LaSalle
Matthew Duthie, Vice President
Rockefeller Group Development Corp.
William Stoddard, Vice President
Vornado Realty Trust
Anthony Campbell, Vice President
ATCO Properties and Management, Inc.
Avi Itzikowitz, Secretary
Energy Spectrum
Edward Strauss, Treasurer

BOARD OF DIRECTORS

650 Fifth Avenue Company
Kathleen Murphy
Beacon Capital Partners, LLC
Michael W. McMahon
Cassidy Turley, Inc.
Thomas C. Waldron, Jr., P.E.
Con Edison Solutions
Michael Forese
Corporation of Trinity Church
Al Amore
EnergyWatch Inc.
Keena Hammond, LEED AP
First New York Management
John Bowen
Fisher Brothers
Michele Kilcullen
Great Forest, Inc.
Drew Masters, LEED AP
L & L Holding Company
Henry Celestino
Lime Energy Co.
Robert Meier, P.E.
Monday Properties
Caroline M. Molloy, R.P.A., LEED AP
NYU Langone Medical Center
John Bartlik, P.E., CEM, CEP
Real Estate Board of NY
Angela Sung
Silverstein Properties, Inc.
Jason McCalla

renewable sources. Almost as remarkable is the fact that competitive procurement will save GSA \$3.5 million when comparing the new rates to prior contracts for these same facilities.

- **Bloomberg LP.** The Bloomberg sustainability program is on track to reduce its carbon footprint 50% by 2013 (from a 2007 baseline) through implementing energy efficiency measures, increasing renewable resource use and activating comprehensive waste reduction strategies. Bloomberg's commitment extends beyond its own doors, engaging vendors and customers in setting standards, promoting clean technologies, and reducing the use of natural resources. Bloomberg's goal is to provide reliable, actionable information that drives responsible investment decisions across the value chain. Bloomberg's sustainability commitment blends traditional sustainable efforts with their core business of providing superior data, analytics, and news – to help move society toward a low-carbon economy.

After presenting certificates celebrating each nomination, ENYA Committee Chair Alec Salticov, representing the Corporation of Trinity Church, and NYECC Executive Director David F. Bomke presented the 2011 Energy New York Awards to the General Services Administration, represented by Brian Magden and Dorothy Kallon, and to Bloomberg LP, represented by Ron Auriana, Curtis Ravenel, and others.
